CODING BLOCKS

Recursion

- Starting with Recursion
- Mathematical Induction

Sumeet Malik

Recursion

Recursion in computer science is a method where the solution to a problem depends on solutions to smaller instances of the same problem.

Lets write some code

- PrintDecreasing
- PrintIncreasing

Your turn

- PrintDecreasingIncreasing
- PrintDecreasingIncreasing (odd decreasing, even increasing)

Lets write some code

- Factorial
- Fibonacci
- Power(x, n)

Lets do these problems

Given an array

- Check if it is sorted
- Check if it contains a given element
- Find FirstIndex of a given element
- Find LastIndex of a given element
- Return an array containing all indices of a given element

Your Turn

- Recursive Bubble Sort
- Recursive Selection Sort

Your Turn

- Recursive Pattern

```
*
*   *
*   *   *
*   *   *   *
*   *   *   *   *
```

- Recursive Pascal Triangle

```
1
1   1
1   2   1
1   3   3   1
1   4   6   4   1
```
